# Custom powders for rotational molding

Under the ICORENE brand name, ICO designs and sells specialty stone and speckle effects formulated for excellent process ability. We only use prime, FDA and UL approved resins, but offer a broad range of grades to suit your needs. Our standard products are rated for UV-8 light stability, but this can be enhanced to UV-15 for more intense outdoor applications. We can custom match your current stone effect, or can cooperatively develop a new effect or performance characteristic that sets your products apart from the competition."

Craig Davis  
VP Sales/Marketing  
ICO North America
